EXAMINER'S AMENDMENT

1. In view of the allowance of the generic claim, the election of species requirement is withdrawn by the examiner. All non-elected claims are allowable.

REASONS FOR ALLOWANCE

2. Claims 1-21 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Morris (US 4,416,460) disclosed a braking apparatus comprising: a first rotating member 8 having at least one rigid stop 26; a plurality of flexible stops 15 which are selectively movable toward said first rotating member to engage said at one rigid stop; and an actuator 14 which is slidable to selectively engage said plurality of flexible stops and cause said flexible stops to move toward said first rotating member to engage the rigid stop. However Morris failed to disclose wherein the actuator is arranged such that sliding movement thereof changes the number of the flexible stops engaging the rigid stop to provide incremental braking and also actuator which is operable to move a selected number of rows of the flexible stops into their engaged positions to provide incremental braking of the first rotating member.

The aforementioned limitations and the arrangements thereof are not taught in the prior art. In light of the foregoing, the claims of present application are found to be patentable over prior art of record.
